

First steps

You will receive your account number and a temporary password via E-Mail.

Sehr geehrte(r) John Doe,
Der folgende Account wurde angelegt (oder das Passwort zurückgesetzt):
Benutzername: Doe, John
Account: 1507221842205
Passwort: 88501

Bei der ersten bzw. nächsten Anmeldung muss das Passwort geändert werden.

WICHTIG für Heimbewohner: Wird das Passwort nicht geändert, so ist kein Internetzugang möglich.
Die VCADMIN-Seite ist im Heim nur über das Ethernet und nicht über das WLAN erreichbar.

Virtueller Campus Graz / Betrieb

The temporary password must be changed to a self-chosen password as soon as possible. This MUST be done on a PC/laptop, NOT on a mobile device!

<https://vadmin.vc-graz.ac.at>

Open the link above.

Enter your “account number” as well as the “temporary password”.

Under the tab “Passwort ändern” enter your temporary password, as well as a **new, self-chosen password!**

If the password change was successful, you will be rerouted to the start page and a message stating “Das Passwort wurde erfolgreich geändert.” will appear.

To confirm your data has been saved in the system, log out and immediately log back in, using your new account information.

Under the tab “Eigene Daten“ you can check your account status as well as your personal data.

The screenshot shows a web browser window with the URL `https://vadmin.vc-graz.ac.at/vcg/mod/todolist/todoOverview.html`. The page title is "Virtueller Campus Graz". On the left, there is a navigation menu with the following items: "Rolle: hbw", "Home", "ToDo-Liste", "Personen", "Eigene Daten", "Passwort ändern", "Einstellungen", and "Abmelden". The "Eigene Daten" section is active. The main content area is titled "Eigene Daten" and contains the following fields:

- Benutzerkonto:** 1507221842205

- Aktueller Datentransfer (Upload):**
- Aktueller Datentransfer (Download):**
- Sperrgrund:**

At the bottom of the page, there is a note: "Änderungen an den Daten können nur durch einen Heim-Administrator durchgeführt werden."

WIN10: set up WIFI connection

<p>You will receive your account number and a temporary password via E-Mail. The temporary password must be changed to a self-chosen password as soon as possible!</p>	<p>First steps</p>
<p>If there have been previous, unsuccessful attempts to set up a WIFI connection, the WIFI profile must first be deleted.</p>	<p>WIN10: delete WIFI profile</p>
<p>Select the WIFI profile "VCGraz".</p>	 <p>The screenshot shows the Windows Network & Internet settings page. At the top, the 'VCGraz' network is listed as 'Secured' with a checkmark next to 'Connect automatically'. A 'Connect' button is visible. Below this, the 'Network & Internet settings' section is shown, with 'Wi-Fi' selected and 'Airplane mode' and 'Mobile hotspot' options visible.</p>
<p>Enter your "account number" as well as your <u>new</u> "password".</p>	 <p>The screenshot shows a dialog box titled 'VCGraz Secured' with the instruction 'Enter your user name and password'. It contains two input fields: the first contains the account number '1507221842205' and the second contains a masked password. 'OK' and 'Cancel' buttons are at the bottom.</p>
<p>If asked about a certificate: Confirm with "Connect" to finish the setup process.</p>	 <p>The screenshot shows a dialog box titled 'VCGraz Secured' with the question 'Continue connecting?'. The text below asks if the user expects to find VCGraz in the location and offers to show certificate details. 'Connect' and 'Cancel' buttons are at the bottom.</p>
<p>If the connection has been established, "Connected, secured" will appear below the network name.</p>	 <p>A small portion of the network settings page is visible, showing the status 'Connected, secured' below the network name.</p>
<p>If the connection could not be established, the WIFI profile must be added manually.</p>	<p>WIN10: set up WIFI connection alternative</p>

WIN10: set up WIFI connection alternative

You will receive your account number and a temporary password via E-Mail. The temporary password must be changed to a self-chosen password as soon as possible!

First steps

If there have been previous, unsuccessful attempts to set up a WIFI connection, the WIFI profile must first be deleted.

WIN10: delete WIFI profile

Open the control panel by clicking the **“windows symbol”** and then the **“gearwheel”**.

Alternatively, the settings can be opened using the key combination [Windows] + [I].

In the control panel, open **“Network & Internet”**.

Under the tab **“Wi-Fi”**, select **“Manage known networks”**.

<p>Select "Add a new network" to manually add a new WIFI network.</p>	 <p>Wi-Fi</p> <p>Manage known networks</p> <p>+ Add a new network</p> <p>Search this list</p> <p>Sort by: Preference Filter by: All</p>
<p>Type "VCGraz" as the network name.</p> <p>Select: "WPA2-Enterprise AES" as the security type.</p> <p>"PEAP" as the EAP method.</p> <p>"EAP-MSCHAP v2" as the authentication method</p> <p>Confirm with "Save".</p>	 <p>Add a new network</p> <p>Network name</p> <p>VCGraz</p> <p>Security type</p> <p>WPA2-Enterprise AES</p> <p>EAP method</p> <p>Protected EAP (PEAP)</p> <p>Authentication method</p> <p>Secured password (EAP-MSCHAP v2)</p> <p><input checked="" type="checkbox"/> Connect automatically</p> <p><input type="checkbox"/> Connect even if this network is not broadcasting</p> <p>Save Cancel</p>
<p>Select WIFI profile "VCGraz".</p>	 <p>VCGraz Secured</p> <p><input checked="" type="checkbox"/> Connect automatically</p> <p>Connect</p> <p>Network & Internet settings Change settings, such as making a connection metered.</p> <p>Wi-Fi Airplane mode Mobile hotspot</p>

<p>Enter your “account number” as well as your new “password”.</p>	
<p>If asked about a certificate: Confirm with “Connect” to finish the setup process.</p>	
<p>If the connection has been established, “Connected, secured” will appear below the network name.</p>	

WIN10: delete WIFI profile

Open the control panel by clicking the “windows symbol” and then the “gearwheel”.

Alternatively, the settings can be opened using the key combination [Windows] + [I].

In the control panel, open “Network & Internet”.

Under the tab “Wi-Fi”, select “Manage known networks”.

Select the network you want to delete.

Delete the network by clicking “Forget”.
